DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention I: Claims 1-6, 11-16 and 25-34 are drawn to a method of providing account reconciliation for an account, classified in 705, subclass 39.

Invention II: Claims 7-10 are drawn to a method of travel account reconciliation, classified in 705, subclass 39.

Invention III: Claims 17-21 are drawn to an account reconciliation method for reconciling a plurality of merchant records with a card statement, classified in 705, subclass 39.

Invention IV: Claims 22-24 are drawn to an account reconciliation system for reconciling an account, classified in 705, subclass 39.

2. The inventions I, II, III and IV are distinct, each from the other because of the following reasons:

Inventions I-IV are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable.

These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01). In the instant case,

inventions II-IV have separate utility such as plurality of card transactions, a pending payment, reconciling a plurality of merchant records with a card statement, and a client side computing device having a display and an input means respectively. See MPEP § 806.05(d).

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. A telephone call attempt was made to Mr. Sobelman on August 22, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.
